

THE ULTIMATE BITCOIN MONEY MAKING GUIDE

Version 1.0

Created By Premium Access

Introduction

You bought this e-book because you are most likely already familiar with bitcoins. For those who are not familiar, here is a brief definition:

“A digital currency in which transactions can be performed without the need for a central bank”

Bitcoins are very easy to exchange and there are no formal regulations for the currency. You can always do your own research to learn more about bitcoins and how to engage in trading. You bought this book to learn about the many wonderful ways you can earn bitcoins. Luckily, there are such a vast amount of methods, there is virtually a method to suit anyone ...based on your free time and what financial gain you intend on receiving.

This e-book is categorized based on these different methods:

1. **Doing nothing**
2. **Completing tasks**
3. **Trading/Investing**
4. **Gambling & Playing Games**
5. **Selling Products/Services**

Within those categories there are tons of methods to earn bitcoins. You will learn about all of these methods and have the opportunity to earn bitcoins almost instantly.

Doing Nothing

You can earn bitcoins doing nothing. Just sign up and many Bitcoin, Dogecoin, Litecoin etc will be add to your Wallet. For [Sign up](#) and doing nothing but [earn Bitcoin etc go to here](#).

These are websites called faucets that give you bitcoins. Of course, these are only small amounts to get you started with the currency, but who could complain when you're getting bitcoins for doing nothing! There are tons of bitcoin faucets out there. You can get free bitcoins from most of these websites multiple times a day. Here is a list of bitcoin faucets available and links to their websites:

[Freebitcoin](#) (A personal favorite)

Earn Bitcoin from Social Media : [**Bit Landers**](#)

Believe it or not, there are still more bitcoin faucets available. Depending on how much time you have on your hands, you can accumulate a few bitcoins using this method. It just takes time.

Completing Tasks

You can earn small amounts of bitcoins completing tasks (clicks, surveys, etc.) on many websites. Although the payout for these tasks may be low, they don't take much time to complete. Here are some of the best websites that offer this.

Viewing Ads

Surf-Profit is perfect if you want to earn bitcoins while doing other things. The Ads change on their own and you are free to visit other websites once the Surf-Profit tab remains open. They also offer over 90 Ads on a regular basis.

BTCclicks : earn bitcoin if you click ads.

CoinAd : same like Btcclicks will earn bitcoin if you click ads.

URL Shortening

If you are someone who posts a lot of links or downloads, you can earn some bitcoins shortening URLs. For those we recommend **CoinURL**. CoinURL makes this really easy, and you can download an Ad-On for Google Chrome and Firefox that allows you to shorten links by right-clicking on them. **Adfocus** is the same site like coin url can earn bitcoin and dollars shortening URLs.

Other Miscellaneous Tasks (Surveys, Watch Videos, Etc.)

BitcoinGet – Earn bitcoins watching videos and doing simple tasks.

CoinWorker – Earn doing tasks, payout is a bit higher than other websites

Rugatu – Earn bitcoins by answering forum questions.

ABitBack – They offer a program called Radio Loyalty, which pays you 1 point (30uBTC) every few minutes for just listening to the radio. You can also watch videos for bitcoins..

Trading/Investing

If you're looking to buy or trade Bitcoin, for either currency of a specific country or for other digital currencies, the place to do it is at a Bitcoin exchange. An exchange is in its basic form a market organized for the purpose of buying and selling investments, currencies, and other financial instruments. Of course, for this kind of method an investment is necessary.

Listed below are all the Bitcoin exchanges that I am aware of.

Coinbase – The most reputable source for Americans looking to get into Bitcoin. They've received more startup capital than any other, and they're adding about 10,000 new accounts per day! We use their services daily.

Cryptsy – Our favorite trading bourse that offers an abundance of crypto currencies. Like coinbase, they're growing exceedingly fast and struggling sometimes to handle the rapid increase in volume. Despite some minor issues now and then, every issue has been resolved professionally by their team. We use their services daily.

Bter – Another one of our favorite crypto exchanges. They're based in the British Virgin Islands and have been able to handle the volume. Very professional with very fast fill times. We also use their services daily.

Coins-e – This exchange has not yet seen the massive increase in activity that coinbase and cryptsy have. Those spreads are wider and activity – meaning daily trading volume – is a little on the light side. Nonetheless, we like this exchange and use it daily.

HashProfit – This is a simple Cloud Mining and earn bitcoin profit everyday automatically send to your wallet. GET FREE 7 days 200 Khs.

Gaw Minners – Same like Hasprofit but not Khs only in cloud mining . In here, you can choose type of Cloud Mining you want, GHS or KHS Script.

Gambling & Playing Games

Bitcoin-based gambling has opened up a lot of new doors when it comes to how online casinos work and how it affects the people that play in them. Traditionally, it would take days or weeks to get deposits to a casino, and the same amount of time (if not more) to get it back out. With the invention of Bitcoin, however, this is no longer the same. Instead, deposits and withdrawals can be handled instantly and securely at any time of the day or night. Adding in things like security and anonymity really helps make Bitcoin shine.

Located below you will find the top gambling sites.

Betcoin - Best Deposit Bonuses, Many Games to Choose from, Industry Leader

SatoshiBet - Provably Fair, Anonymous, No Downloads and Instant Play, Roulette, Blackjack, Lucky6, War, Baccarat, Video Poker and More!

BitCasino - Over 110 Slot Games. 100% Deposit Bonus! Dice, Lotto and Casino Games with Live Dealers

999Dice – This is a dice game I have been experimenting with using a Bot. It is somewhat autopilot. Once you register you can claim free bitcoins every 10 minutes, which can use to bet with.

You can download the Bot from this program from **here**.

1. Open The Bot and Press on LOAD PAGE.
2. Log-in to your account
3. Change "Reset Losing Streak" To whatever you want. I usually use 3-5
4. Press on Start Bot and leave it running

With the above method you can boost up your earnings without having to manually bet.

SatoshiMine - A bitcoin version of Minesweeper. I have a method for the website to make 100% profit. You will have invest a small amount for this.

1. Play a few practice rounds before depositing.
2. Deposit some BTC.
3. Bet 1/3 of what you deposited and select 3 mines.
4. Click random 3 places.

Playing Games

Gambit – Has a lot of games and you get some free bitcoins just for joining.

High/Low Card - Choose whether you think the next card will be Higher or Lower than the previous to win Bitcoins. Stop and take your winnings at any time!

Bong Bitcoin – This website also has a list of games you can currently play for bitcoins.

Selling Products/Services

There are many websites that allow you to sell items for bitcoins. Some of them are:

Gylde - Glyde is the easiest way to buy and sell new and used smartphones, tablets, MacBooks, video games, and iPods.

Cryptothrift - Bitcoin marketplace and auction site with automated escrow

Sell Services

Bit Task - Post job listings and search available listings. Many of the listed open jobs are related to programming

Also, if you own a website or store you can integrate payments with bitcoins using Coinbase.

Blackhat Method

Bitcoin Wallet Stealer

Among the many other ways a getting bitcoins, there is the unethical method of stealing bitcoin wallets.

This process takes a bit of computer coding knowledge that may be foreign to newbies. However, it can be learned in less than an hour. You are going to have to prepare a bitcoin wallet stealer. This tiny program/virus looks inside your computer “appdata” folder. If it finds the wallet.dat file, it uploads it into the hacker server using FTP, or file transfer protocol. It’s not hard to find potential victims, either. You can incorporate the virus inside of another program. So that when a user downloads it, this information becomes available.

The source code you need to make the program/virus is **here**.

You can follow **this guide** if you need to learn how to make an .exe file from the source code provided.

These niches are perfect for getting potential victims: Forums related to bitcoins and cryprocurrencies, Hacking forums, Monetizing forums. You can also sell your compiled program to interested buyers.
